Hello, I've a decade's experience shooting and editing a huge range of documentaries, narrative films and branded content. I have a broad set of production skills; being just as happy directing a human focused documentary as I am as DP on a historical feature film. I use a range of cameras from my own Sony FX6 & FX3; to Arri Alexa or Sony Venice, always with an eye for great lenses and filters. I also edit most of my documentary and brand films. I have a strong connection with Mongolia; where I've produced films that have screened at A-list festivals. Looking forward to working with you soon, Ian.
